**STATIC
BONDING/
GROUNDING
EQUIPMENT**

Bulletin 55
(2-08)

NEW MANUAL REEL

This is the simplest form of static bonding cable reel. Light weight and durable. Ask for Bulletin 163, for more information.

AMETEK CABLE REEL

The best reel we have ever found. No whipping, No tangles, positively controlled speed with three centrifugal speed brakes. Small, light weight and tough. See Bulletin 54 for complete details.

STATIC BONDING/GROUNDING CABLE

We offer a wide range of grounding cable. Our cable is made with 7 x 7 galvanized steel or stainless steel wire. It is coated with a tough vinyl or even tougher compounded polyester coating. It is available in *Clear, Day-Glo Red, High Visibility Orange and Kink Resistant Bright Yellow*. It can be bought by the foot or on 1,000' spools. For more information, see Bulletin 98.

BONDING/GROUNDING PLUG Includes hex end cap to secure cable.

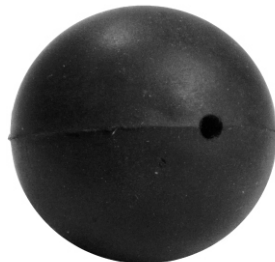

GTP-1097S-1 Conforms to Mil-C-83413/4 made of passivated stainless steel.

GTP-1097B Same dimensions as above but made of solid brass.

RUBBER STOP BALLS

For grounding reel cables, these 1 1/4" round stop balls are tough and long lasting

GTP-1486

CUSTOM CABLE ASSEMBLIES

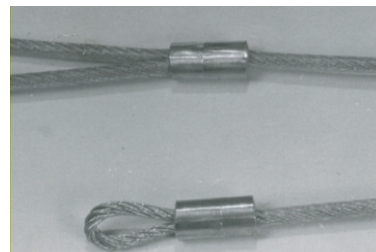

We can make up just about any grounding cable assembly you can think of. Just ask and we will be happy to prepare a quote. NO penalty for small orders.

CABLE CRIMPER

MAKE YOUR OWN ASSEMBLIES
Heavy duty industrial crimper with 150 crimps. Secure joints and strong cable end loops.

GTP-1390 Tool and 150 Crimps
GTP-1391 150 extra Crimps

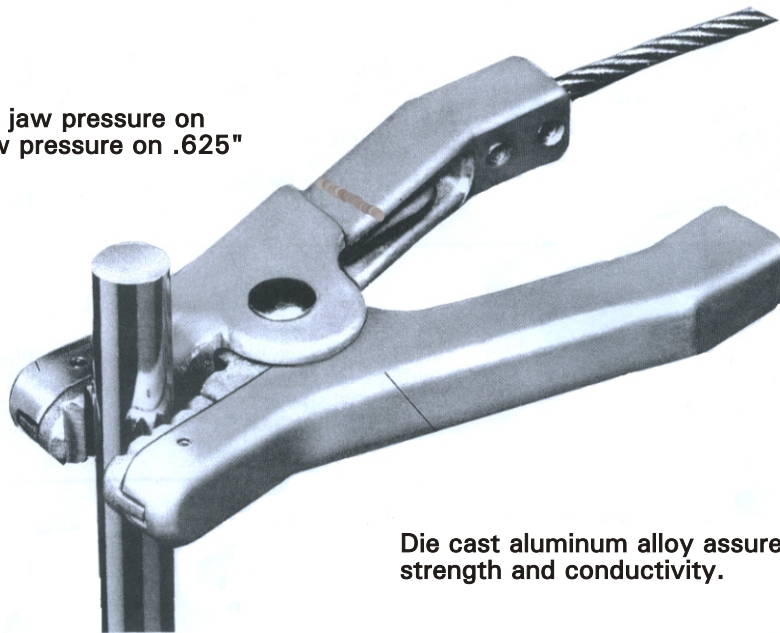

Note: Plastic must be stripped from cable with razor at crimping point.

THE SUPER CLAMP

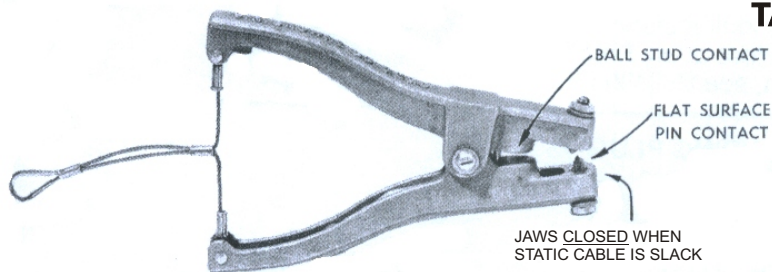

Torsion spring provides 30 lbs. jaw pressure on .500" diameter rod; 40 lbs. jaw pressure on .625" diameter rod.

When clamped on grounding post, less than 5 ohms resistance from posts to ends of handles.

Die cast aluminum alloy assures maximum strength and conductivity.

Do not go thru the "motions" of grounding. Be sure the aircraft and refueler are really bonded together. This tough clamp conforms to MIL-C-83413/7 Length 4.1", weight: 4 oz. **Model GTP-1101**

TANK TRUCK BONDING/GROUNDING CLAMP

Note 3 UNIQUE features!

Ball stud contact for trucks with ball studs
Pin contact for trucks without ball stud mounts. Quick-release sling automatically opens jaws if driver fails to disconnect clamp

GTP-1102A Clamp without ball stud mounts
GTP-1102 Clamp with ball stud mounts

BONDING/GROUNDING CLIPS

HEAVY DUTY MUELLER CLIPS SOLID COPPER OR ZINC PLATED STEEL

1 DOZEN MINIMUM ORDER

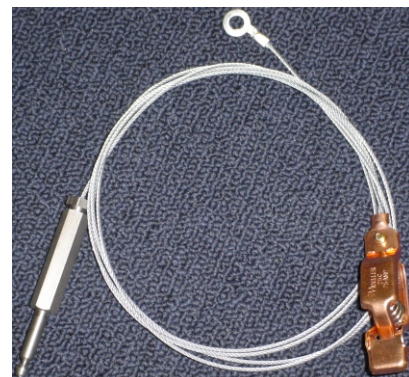

For example: if you order 1 GTP-1096C, you will get 1doz.

PART NO.	LENGTH
COPPER	
GTP-5891C	2 1/2"
GTP-5890C	3"
GTP-1096C	4"
GTP-1297C	6"
STEEL	
GTP-1096S	4"
GTP-1297S	6"

OVERWING BONDING/GROUNDING ASSEMBLIES

Overwing Bonding/ Grounding Assembly 90" with clip. NFPA requirement you must bond before removing cap on aircraft **GTP-1095**. (Not pictured).

Cable, Plug and Clip Assembly 48" overall **GTP-1094**.(as shown above).
